Shut the door – smoke kills!

Contain the fire!

If there is a fire in your apartment – get out and close the door behind you. That way the fire and poisonous smoke will not spread to the stairwell so quickly. Call 112.

Never go out into a smoke-filled corridor or stairway!

If there is a fire in someone else's apartment and the stairwell is filled with smoke – stay in your apartment and keep your doors and windows shut! Smoke is very dangerous and quickly kills. Call 112. Rescue services will help you to get out. Your apartment can resist penetration of fire and smoke for 30 to 60 minutes. Remember to check your fire alarm!
